SKILLS

- Languages : TypeScript, JavaScript, Java, C++, Python, SQL
- Frontend : React.js, Tailwind CSS, Three.js, HTML, CSS
- Backend and DevOps : Node.js, Express.js, FastAPI, MongoDB, PostgreSQL, Supabase, Git
- AI : Langchain, LangGraph, Chroma DB, GenAI

PROJECTS

Higenbot : Multi-agent 2D game generation platform

- Built a multi-agent **LangGraph pipeline** where four AI agents (Creative Director → Game Designer → Programmer → QA Tester) collaborate sequentially to generate playable **Vanilla Canvas** games from a single prompt.
- Implemented real-time **WebSocket streaming** to deliver agent progress, file generation events, and QA results to the frontend as they happen.
- Added a **chat interface** for post-generation edits that modifies game files on request and runs QA checks before applying changes. ([Try it here](#))

Shay : AI integrated schema designing canvas

- Created a **React Flow canvas** for visual table management and automated foreign-key mapping.
- Implemented a **smart saving system** that syncs project data to Supabase only after user activity pauses to **save on API calls**.
- Built an AI assistant that translates text instructions into live, side-by-side schema drafts for verification.
- Built a **multi-dialect SQL exporter** for PostgreSQL, MySQL, and SQLite. ([Try it here](#))

Pitch Perfect : Pitch for AI investors

- Developed a web platform for founders to practice pitches against specialized AI investor personas
- Integrated **ElevenLabs WebRTC** to achieve **sub-500ms voice-to-voice latency**, enabling natural, real-time interruptions.
- Prompt engineered guardrails for unique investor personas and specialized questioning styles. ([Try it here](#))

ACHIEVEMENTS

- Actively **teaching 20+ students DSA fundamentals** at **Hash Define** (The Technical Society of BPIT)
- Earned an official nomination for the **Smart India Hackathon** National phase.
- Solved **275+ DSA questions** across platforms.
- Rated **1000+ on codeforces** and **1400 on leetcode**.
